

Inhale and breathe again.
Virus-bacteria filter for
hygienic exhaust air.

 **DÜRR
DENTAL**
THE BEST, BY DESIGN

Remove up to 99.999 % of all risks from exhaust air: with a HEPA H14 exhaust air virus-bacteria filter

Tests of the exhaust air virus-bacteria filters carried out by the
Università di Camerino produced the following results:

Removal of environmentally hazardous particles*:

99.995 % retention rate for particles
< 0,3 μm

Removal of hazardous bacteria:

> 99.999 % retention rate for staphylococcus
aureus ATCC bacterium

Removal of hazardous viruses:

> 99.99 % retention rate for the test virus PhiX174
(size 25-30 nm)

Testvirus PhiX174
25 to 30 nm

COVID-19 Virus
60 to 140 nm

**Demonstrate a responsible approach
to the health of your patients even
outside your practice. Always install a
virus-bacteria filter in the exhaust air
line of your suction system.**

*Filter quality HEPA H14 according to EN 1822-1:2019-10 / ISO 45H according to ISO 29463-3:2018

With the installation of a Dürr Dental Virus-bacteria filter you safely counteract the risk of contamination of the exhaust air.
