

INTRODUCING

THE REVOLUTIONARY HANDPIECE ATTACHMENT FOR MOCOM TETHYS H10+

THANKS TO THE NEW HMD, TETHYS H10+ IS NOW ALSO A HANDPIECE THERMAL DISINFECTOR.

The new Handpiece Attachment for Mocom Tethys H10+ allows handpieces and scaler tips to be thermally disinfected. This latest accessory makes it possible to wash, thermally disinfect and dry up to 6 instruments, turbines or micromotor handpieces, simultaneously. You can also process up to 3 scaler tips at once.

The Handpiece Attachment is compatible with all Mocom Tethys H10+ units, including those that have already been installed, a simple firmware update is all that is needed.

Attachment easily removed.

ADAPTERS FOR ANY NEED.

The Handpiece Attachment allows you to process:

- Micromotor handpieces
- Turbines
- Scaler tips

Just insert the specific adapter for the family of instruments, in order to ensure proper cleaning of the instrument.

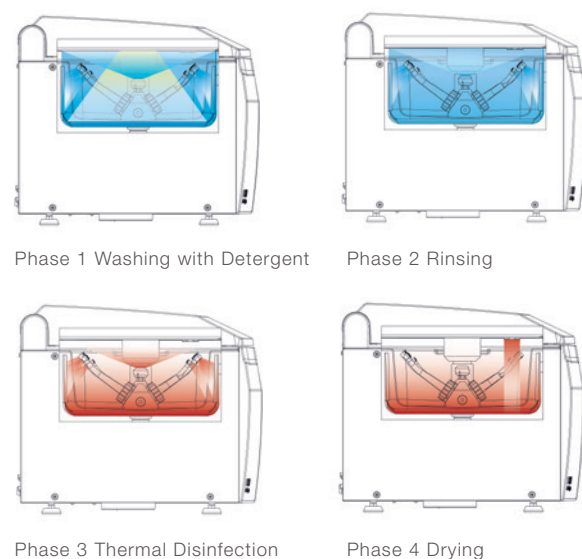

Handpiece Cycle on your Mocom Tethys H10+

With the new handpiece cycle and the dedicated support, a cycle can be completed in just 34 minutes.

This cycle consists of:

- Washing internal & external (no ultrasound)
- Thermal disinfection
- Drying

TO START USING THE HANDPIECE ATTACHMENT FOR MOCOM TETHYS H10+, CONTACT MOCOM AUSTRALIA FOR YOUR FIRMWARE UPDATE TODAY.

Please contact your local Mocom Australia Service Technician via mocomaustralia.com.au to book in your firmware upgrade or direct at 0427 816 459 or sales@mocomaustralia.com.au with any questions.
