

# Dual Tank Washer for 3D Prints

# CLEANI

## Taking the Work out of Workflow

CLEANI is designed with dual tanks for a two-stage cleaning process that allows for heavy and fine washes. With a workflow that's three times faster, CLEANI consumes 50% less alcohol than a manual wash and effectively removes 90% of uncured resins from prints.

- A seamless move from Printer to Washer.
- Clean both your Build Platform and Prints at the same time.
- Dual tanks for an optimal 2-stage cleaning solution.
- Save 50% of the alcohol used in the cleaning process.
- Clean 90% of resin residue with less time and effort.
