

# CLEANI

Dual-tank Washer

Take the work out of the workflow

Cleani is designed with dual tanks for a two-stage cleaning process that allows for heavy and fine washes. With a workflow that's three times faster, Cleani consumes 50% less alcohol than a manual wash and effectively removes 90% of uncured resins from prints.

## Save Costs

- Soft washing vibrations minimize print damage and save re-printing costs
- Alcohol consumption reduced by 50%

## Save Time

- Removes 90% of resin residue in one wash cycle
- A finishing process that is four times faster
- Print platform and prints can be washed together
- Dual tanks shorten cleaning time and prevent cross contamination

## Elevate Your Practice

- Seamless upgrade for your workflow
- Portable, compact with an aesthetic design
- Larger washing space to accommodate more prints
- Easy maintenance with removable tanks
