- 3D Printing / Milling

A cornerstone of digital dentistry, IOS significantly enhance the power of your practice with precision, speed and efficiency. Here's how they contribute to making digital dentistry so effective:

- Precision and Accuracy
- Speed and Efficiency
- Seamless Integration with CAD/CAM
- Enhanced Patient Communication
- Reproducibility and Storage
- Eco-Friendly and Comfortable
- AI and Predictive Capabilities

Whether you are doing Implantology, Endodontics, Cosmetic or Restorative dentistry, IOS creates a powerful bridge to connect your diagnostics and treatment planning with in-house production. Our range of IOS brands provides you the flexibility and capacity to link your workflow and expand your digital journey.
